

Research Advances in Land Change and Soil Erosion Effects

Guest Editors:

Dr. Xiaofei Ma

State Key Laboratory of Desert and Oasis Ecology, Xinjiang Institute of Ecology and Geography, Chinese Academy of Sciences, Urumqi 830011, China

Dr. Wei Yan

School of Geographic Sciences, Xinyang Normal University, Xinyang 464000, China

Prof. Dr. Yonghui Wang

School of Geographic Sciences and Tourism, Xinjiang Normal University, Urumqi 830054, China

Deadline for manuscript submissions:

closed (29 November 2023)

Message from the Guest Editors

Production depends on material data, the source of which is the soil on the surface. Soil erosion takes away most of the nutrient-rich soil, which is not conducive to the sustainable development of land and society. Therefore, we are committed to soil erosion research, looking at soil erosion both globally and regionally to find ways to improve it with the following aims in mind :

1. To analyze the contribution of each factor to the accuracy of soil erosion simulation and its optimization method.
2. To analyze the characteristics of soil erosion and its changes in the context of current and future climate change.
3. To optimize the accuracy of soil erosion models to simulate soil erosion.
4. To clarify the mechanism of soil erosion, and control erosion from the source according to local conditions.

In this Special Issue, **Research areas** may include (but are not limited to) the following:

- Global climate change and soil loss;
- Agricultural production security and soil erosion prediction;
- Soil erosion modeling and optimization.

We look forward to receiving your contributions.

an Open Access Journal by MDPI

Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
