Ibaraki, Japan

Deadline for manuscript
submissions:

10 February 2025

Message from the Guest Editor

Global warming is a real threat for the society. Energy produces from nonrenewable energy sources enhanced CO₂ emission globally and thus it is a key concern for the global warming/climate change and decarbonization. Furthermore, materials processing for multifunctional applications are also emit CO₂. Sustainable materials are advancing rapidly to achieve zero-carbon legislation targets. From the environmental perspective, the deployment of urban and futuristic sustainable materials technologies is essential. Thus, decarbonization of energy and materials are much sought after for the sustainable development.

Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
