Message from the Guest Editors

Dear Colleagues,

At present, the demand for energy is increasing worldwide, and the continuous consumption of non-renewable energy sources leads to ecological degradation and even seriously affects human life and health. In response to the increasing consumption of limited traditional fossil fuel energy on the Earth, the search for sustainable energy sources with reduced carbon emissions and the study of green sustainable energy sources and energy storage technologies are urgent needs for the sustainable development of human civilization. Therefore, in this context, researchers are focused on achieving these requirements by exploring and developing advanced, sustainable, green, nano- and micro-scale novel materials for sustainable ecosystems as well as sustainable health monitoring processes.

Welcomed topics include but are not limited to sustainable human body mechanical energy storage, sustainable human body mechanical energy sensing, triboelectric nanogenerators for sustainable energy applications, triboelectric nanogenerator fabrication for recyclable materials, and sustainable health monitoring.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
