### Message from the Guest Editors

Dear Colleagues,

There are many perspectives to consider when writing about sustainable economic development. Many authors have analyzed the relationship between environmental or social variables and various economic indicators such as GDP, income per capita, etc. Others have focused on the processes that enable a sustainable economic development, for example, sharing economy or intergovernmental programs, while others have explored the transformation of specific industries and the development of instruments such as green finance.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Green economy;
- Green transition of various industries;
- Cycling economy;
- Sharing economy;
- Models covering environmental, social, and SED indicators;
- Business strategies leading to SED;
- Trends in ESG reporting.

We look forward to receiving your contributions.
