Message from the Guest Editors

Pollution is a growing concern worldwide and represents the greatest environmental risk to health which is related to premature death and affects not only the health of living organisms but also climate change. The use of living organisms, i.e., bioindicators, helps to monitor the pollution level including micropollutants and limit the impact of pollution on human health and the environment.

We call for contributions to develop the research on pollution monitoring, especially those which present new approaches to biomonitoring, indicate new directions in the development of this research topic and explore the new possibilities of using organisms for bioindication aims.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Estimating the impact of different pollutants including micropollutants on living organisms;
- Inventing/improving biomonitoring methods and systems;
- Validating biomonitoring methods and systems;
- Comparing different bioindicators in terms of their efficiency;
- Testing new tools in bioindication.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
