Message from the Guest Editors

Dear Colleagues,

We have been observing the intensive development of digitization processes and technologies supporting them for several years. Digital transformation is one of the key trends, the development of which has a significant impact on the current functioning of enterprises and supply chains and the future directions of changes and investments.

This Special Issue on “Sustainable Development of Logistics and Supply Chain Management in the Digital Transformation Era” intends to collect the newest studies in the field.

Potential contributions may include but should not be limited to theoretical papers and/or quantitative studies and/or case studies. With this in mind, we invite theoretical and empirical research able to investigate a variety of lines of inquiry, including:

- Digitalization of supply chains;
- Sustainable development of logistics;
- Sustainable cooperation in the supply chain;
- Relationships between EDG/SDGs and business;
- Ecological controlling;
- EU environmental certification system EMAS;
- Supply chain digitalization framework;
- Digital transformation on supply chain process;
- Digital strategy development framework.

Prof. Dr. Marc A. Rosen

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
