### Message from the Guest Editors

Urban logistics is a major research field that counts numerous advancements and applications. For the purpose of decarbonation and sustainability purpose, urban logistics has been appointed by both public and private stakeholders as a priority to reduce environmental and social nuisances in cities while not degrading urban economies, or even contributing to their growth. In this context, and although the advances in data production and analysis are considerable, there is still the impression that the lack of data still limits the development of urban logistics policies and solutions. On another hand, theoretical contributions do not always meet practical needs.

Deadline for manuscript  
submissions:

**closed (30 June 2023)**

an Open Access Journal by MDPI

## Editor-in-Chief

### **Prof. Dr. Marc A. Rosen**

Applied Science, University of  
Ontario Institute of Technology,  
Oshawa, ON L1G 0C5, Canada

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
