Message from the Guest Editors

The quality of human activities to be carried out without the destruction of the environment and depletion of our planet's resources requires the coexistence of society in harmony with the natural environment, achieving a balance between the current way of existence, characterized by economic growth based on the consumption of natural resources and the protection of the environment through the discovery and implementation of alternative ways of resource usage for their conservation. This goal can be achieved by designing new products and services with the support of new innovative design methods.

We want to campaign for the policy and systems change needed to design a more sustainable future, achieved by sharing the knowledge of design experts, leading to sustainable and inclusive design to inspire the community of scientists.

This Special Issue will constitute a professional and scientific forum for research scientists from universities, research centers, and industry to present recent developments as well as current practices in design innovation for sustainable services.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
