

Sustainable Management of Logistic and Supply Chain

Guest Editors:

Dr. Mladen Krstić

The Department of Biological and Environmental Sciences and Technologies, University of Salento, Lecce, Italy

Dr. Željko Stević

Faculty of Transport and Traffic Engineering, University of East Sarajevo, Doboј, Bosnia and Herzegovina

Dr. Snežana Tadić

Logistics Department, Faculty of Transport and Traffic Engineering, University of Belgrade, Belgrade 11000, Serbia

Deadline for manuscript submissions:

31 July 2025

Message from the Guest Editors

Since the UN promoted the 17 Sustainable Development Goals, sustainability has become one of the most important aspects of any business model.

Green logistics is based on the development and application of the concept of circular economy (CE), which implies a closed loop of material flows in the economic system. The concept of CE is emerging as a potential solution for achieving supply sustainability through the implementation of closed-loops of material flows based on maintenance, repair, reusing, refurbishing, remanufacturing, and recycling processes.

This SI is sustainability research in the context of logistics and supply chain management. The main purpose is to better understand the role of sustainability in the development of logistics and supply chain activities in order to create favorable circumstances for their effective management.

an Open Access Journal by MDPI

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
