submissions:

**15 December 2024**

### Message from the Guest Editors

Dear Colleagues:

The transition to environmentally friendly mobility inevitably requires users to adopt sustainable modes of transport: soft modes such as cycling and walking, public transport, shared cars, and electric vehicles. Users' acceptance of these modes is not self-evident and must be built up. This Special Issue will consider the obstacles, advantages and levers of these sustainable modes of transport from the perspective of users, and will reveal how transitions towards a more ecologically virtuous future can be made; this will take into account users' positive or negative perceptions, reluctance, acceptance factors, discomforts and expectations. These studies will focus on acceptability and users' experiences of these modes, or the experience of transitions towards sustainable modes; they will also cover both current and future modes. Knowledge of these user points of view will help to enhance the design of transport modes, services, incentives and/or infrastructure.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
