Message from the Guest Editors

Dear Colleagues,

The World Bank estimates that 56% of the world's population, or 4.4 billion people, live in cities. Together, they generate 80% of the global GDP. Even so, these cities are not all developed in the same way. The true value of smart cities lies in technology's ability to empower and connect people, well beyond urban development driven by technology. With the advent of smart cities, the importance of sharing will only grow. By exploring sharing opportunities with a human-centric lens, we argue that smart cities can become more prosperous. On the other hand, Sustainable Development Goals demand transdisciplinary collaboration for transformative experiences and outcomes. With the Sharing Smart Cities (SSC) approach, smart cities are reimagined, with a focus on citizen well-being and sustainability, aligned with the Sustainable Development Goals (SDGs). In light of an SSC understanding, sharing should be emphasized as a means to revitalize idle resources.

Submissions to this Special Issue that support sustainable development goals in smart city contexts are encouraged.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
