Deadline for manuscript submissions:

**31 January 2025**

### Message from the Guest Editors

Green Supply Chain Management (GSCM) as a concept provides a framework for imbibing environmental considerations into the operations and activities of companies. As a result, it helps companies monitor the environmental dimensions of their supply chain network and continuously improve supply chain performance.

GSCM for sustainable development aims to achieve the goal of the sustainable development of economic efficiency and the enhancement of firm competitiveness, as well as the enhancement of socio-environmental systems. To this end, in the contemporary business environment, a key question that arises pertains to how organizations might leverage different emerging strands of GSCM to promote sustainable development.

This Special Issue seeks original research articles (analytical, empirical, review and conceptual) that address the major themes of the topic. Research areas may include (but are not limited to) the following:

1. Environmental sustainability modelling;
2. Circular economy;
3. Green supply chain management;
4. Lifecycle assessment;
5. Decision support systems.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
