

Role of Lidar and Microwave Photonic Radar Based Sensors for Autonomous Vehicles

Guest Editors:

Dr. Sushank Chaudhary

Department of Electrical Engineering, Chulalongkorn University, Bangkok 10330, Thailand

Dr. Muhammad Saadi

Department of Electrical Engineering, University of Central Punjab, Lahore 54000, Pakistan

Deadline for manuscript submissions:

closed (31 October 2023)

Message from the Guest Editors

Autonomous vehicles (AVs) have become a prominent sector of the automobiles industries. The last decade has witnessed remarkable trends in research leading to developing AVs as a prospective answer to current transportation issues. Implementing AVs can reduce emissions and energy ingestion, which further decreases ecological degradation. Moreover, it can improve transportation efficiency and accessibility, ease traffic congestion, and enhance road safety. Light detection and ranging (LiDAR) sensors and photonic radars are considered essential sensors for achieving full autonomy of AVs that can produce spatial data with accuracy and precision. This can help localize and track which can tremendously help localize and track a running vehicle. Featured with such AV utilities and requirements, LiDAR/photonic radars are a significant alternative to conventional radars and thus immensely popular among AV manufacturers and researchers across the world. This Special Issue is dedicated to recent advancements and future implications in photonic-based sensors including LiDAR technology for AV vehicles.

an Open Access Journal by MDPI

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
