Message from the Guest Editors

Coal mine safety and risk management are related to the sustainable development of energy and society. With the development of the internet of things, big data and artificial intelligence technology, the intelligent construction of coal mines have been gradually improved. It needs to be deeply explored from the perspective of theory and technology to know how to make full use of advanced technology to solve the problems of coal mine safety and risk management, making it match with the intelligent development of coal mines.

1. New progress in coal mine safety risk management in China
2. Intelligent development of coal mine safety mining
3. Data mining and big data in sustainable risk management in coal mining
4. Study on the safety behavior of coal mine workers
5. Methods and efficiency of coal mine safety regulation
6. Intelligent identification and early warning technology of coal mine risk
7. Sustainable risk evaluation methods for coal mine
8. Intelligent decision-making of coal mine safety and risk management
9. Safety risk hierarchical management and control as well as hidden trouble investigation and management
10. Progress in theoretical research on coal mine safety and risk management

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
