Deadline for manuscript  
submissions:

**closed (26 February 2024)**

### Message from the Guest Editor

Stability and efficient long-term energy storage techniques are important for the renewable energy utilization. The flow battery is one of the most potential long-term energy storage techniques. The more fundamental principles and optimizing strategies are needed to promote the battery performance and stability of the redox flow battery, which involves multidisciplinary researches in many fields, such as the functional materials, flow field design, integration strategy and electrode modification, etc.

This Special Issue invites authors to contribute on flow fields design for redox flow batteries, electrode materials modification, electrolyte materials modification, membrane materials design and stability and optimization of flow batteries performance.

Research areas:

1. Electrode materials and structure design for redox flow batteries;
2. Flow fields design for redox flow batteries;
3. Membrane materials in redox flow batteries;
4. Transport phenomenon and dynamics in redox flow batteries;
5. Modelling, optimization, and numerical simulation;
6. Electrode and membrane modification;
7. Optimization of the redox flow batteries;
8. Integration of the redox flow batteries;

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
