

Sustainability of Building Materials and Civil Engineering Materials

Guest Editors:

Prof. Dr. Pedro Muñoz-Velasco

Escuela Superior de Ingeniería y Tecnología (ESIT), Universidad Internacional de La Rioja, 26006 Logroño, Spain

Dr. Viviana C. Letelier Gonzalez

Facultad de Ingeniería y Ciencia, Universidad de La Frontera, 478000 Temuco, Chile

Deadline for manuscript submissions:

closed (30 July 2023)

Message from the Guest Editors

The construction and building industry are one of the world economy's largest sectors, but also one of the largest contributors to environmental disruption and pollution. Therefore, the sector must shift towards sustainable. Firstly, the embedded footprint of the building and civil engineering materials encompasses extraction, manufacturing, construction, maintenance, and disposal. Hence, the replacement of raw materials by residues in a circular economy approach, reduce energy intensity, wastes, and emissions, or a longer service life may with easier recyclability are areas that hold enormous potential as solutions for lowering environmental impacts. Secondly, these construction materials highly influence the operation of buildings and infrastructures. Thus, improvements related to thermal isolation, hygroscopic behavior, or mechanical response, among others, can help engineers to reduce energy consumption, living discomfort, or the size of structures. For these reasons, this Special Issue is aimed to show the most relevant advances related to building and civil engineering materials from the perspective of a more environmentally friendly footprint.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
