### Message from the Guest Editors

Dear Colleagues,

“*Sustainability and inorganic chemistry*” present a themed Special Issue which focuses on recent new developments and smart application of inorganic/organometallic and organic molecules in industrial application. This Special Issue will include not only greener synthesis, bio-mimicking catalysis, sustainable synthetic methods, reaction mechanisms, heterogeneous catalysis, photocatalysis, sustainable nanomaterials, metal–organic frameworks, quantum dots, renewable and clean fuels, biomass/wastes conversion/transformation water treatment, resource extraction and isolation, renewable energy, catalytic processes, and renewable industrial feedstocks to address industrial issues but also new optical, mechanical, and electrical innovations for smarter applications of inorganic materials in industries.

Dr. Debabrata Sengupta

Dr. Xingjie Wang

Dr. Xiaoliang Wang

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
