Deadline for manuscript submissions:  
**closed (31 May 2024)**

### Message from the Guest Editors

Dear Colleagues,

Green technologies play a crucial role in achieving sustainable production, manufacturing, and consumption practices. These technologies aim to minimize the environmental impact of industrial processes, reduce resource consumption, and promote the use of renewable energy sources.

On the above basis, this Special Issue focuses on recent perspectives and new developments regarding the role of green technologies in sustainable production, manufacturing, and consumption. Topics in the scope of this Special Issue include (but are not limited to) issues dealing with renewable energy systems, energy-efficient manufacturing, sustainable materials, waste reduction and recycling, smart grids and energy management systems, water conservation technologies, Internet of Things (IoT) and data analytics, green supply chain management, and circular economy solutions.

Moreover, understanding the facilitators of sustainable consumer behavior has been a topic of great interest in recent marketing literature. This Special Issue also aims to outline a comprehensive framework on key drivers of sustainable consumer behavior change.

We look forward to receiving your contributions.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
