Message from the Guest Editors

Dear Colleagues,
Financial stability as well as systemic risk, which can have catastrophic ramifications for the operation of the financial system, has become a major concern for central banks and policymakers.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

Critical issues in the measurement, modeling, and management of systemic risk;

Systemic risk in financial, banking, and insurance sectors;

Do economic factors lead to shifts in financial connectedness?

The effect of global factors on the connectedness of financial markets;

Potential ramifications of Brexit and Evergrande on local, regional, and global scales of financial connectedness and systemic risk;

Static and dynamic connectedness between financial digital assets;

Financial connectedness of developed and emerging or frontier markets impacted by global shocks;

Return and risk spillovers between financial markets.
