Deadline for manuscript
submissions:

15 March 2025

Message from the Guest Editors

To ensure that there is enough food to meet everyone's needs, food production, the quality and safety of food are crucial in the food system. The special issue focuses on researches that concentrate on ensuring that low-cost, safe, and nutritionally balanced food is accessible. Since ensuring food safety is essential to protecting public health by preventing foodborne illnesses and ensuring that all food products are free from harmful contaminants. Incorporating sustainable practices into food production can significantly reduce the environmental impact of agriculture, preserving natural resources for future generations. By minimizing the use of harmful chemicals and promoting biodiversity, sustainable methods contribute to the health of ecosystems and the long-term viability of food systems. Moreover, integrating renewable energy sources and efficient water management practices in agriculture can further enhance sustainability, reducing the carbon footprint and ensuring the resilience of food production in the face of climate change. Addressing food production through the four pillars of sustainability aligns with the UN SDGs for a more sustainable world.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
