### Message from the Guest Editor

Dear Colleagues,

This Special Issue aims to reach a broad audience of academic researchers, industry professionals, and regulators with novel research on energy consumption and economic growth.

We welcome submissions that represent original, high-quality theoretical and empirical research, as well as policy-oriented research papers that provide definitive conclusions to advance the field of energetics, business, and economics.

We particularly encourage research that focuses on energy and its effects on the economy—which have been profoundly transforming traditional markets—and, in turn, presents new challenges and opportunities for energetics and economic-growth research, including, but not limited to, climate/green, economics/competition, business/startups, and innovation/big data.
