Deadline for manuscript  
submissions:

**closed (30 September 2023)**

### **Message from the Guest Editors**

It is our pleasure to extend this invitation to potentially interested researchers in the field of bio-circular economy of urban and rural areas. With the growth of population and living standards, the contradiction between the demand for resources and the accumulation of urban and rural solid waste has become increasingly prominent, especially during the COVID-19 pandemic. As the saying goes, garbage is the misplaced resource and it would be useful if solid waste can be transformed into high value-added products by biorefinery, such as organic fertilizer, clean energy, feed, and food. This Special Issue aims to promote a sustainable bio-economy in urban and rural areas. Research articles or reviews on applied technologies and mechanisms, as well as government policies, public opinion analysis, and life cycle assessment, are welcome.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
