Message from the Guest Editors

In the last few years, the scientific community has started to investigate the possibility that health effects induced by prolonged noise exposure should be studied in conjunction with other features of noise. Among these remarkable effects are its intensity variation over time, impulsivity of events, frequency distribution, and psychoacoustic parameters. Peak levels, maximum levels, and variability can significantly influence the perception of nuisance, and citizens may complain more about single high levels of noise rather than average exposure. This can be the origin of flaws in dose–effect relationships for annoyance or sleep disturbance.

This Special Issue welcomes papers focused on studying new metrics, indicators, or evaluation methods for noise exposure, and its correlation with annoyance or other health effects, thus not relying only on average exposure to noise. The new findings will support the transition toward sustainable cities and neighborhoods.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
