

## Ecology, Biodiversity and Conservation in Seagrass Ecosystems

Guest Editors:

**Prof. Dr. Peidong Zhang**

**Prof. Dr. Yi Zhou**

**Prof. Dr. Guanglong Qiu**

**Prof. Dr. Zhijian Jiang**

Deadline for manuscript  
submissions:

**closed (31 May 2024)**

### Message from the Guest Editors

Our hope is to find an effective solution for guiding the next stage of seagrass restoration and elucidating the ecological function (e.g., habitat, nursery, carbon sequestration) changes in response to seagrass ecosystem recovery, with important implications for sustainable development.

In this Special Issue, we invite research contributions with cutting-edge studies informing the ecology, biodiversity and conservation practice for seagrass ecosystems. We encourage scientists to publish their experimental and theoretical research relating to the ecology, biology, and physiology of seagrasses, the restoration of seagrass beds, and the management and policies of seagrass conservation, providing new findings and views with the potential to enhance the conservation and sustainable use of seagrass habitats. Original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

ecological function, ecosystem services, biodiversity, ecophysiology, degradation mechanism, ecological restoration, ecosystem recovery, sustainable development and conservation.

We look forward to receiving your contributions.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
