### Message from the Collection Editors

Recent transportation systems have presented many emerging features on both the supply and demand sides. The innovations in electric vehicles, shared vehicles, connected vehicles, and autonomous driving, coupled with increasing green, efficient, convenient and economical travel needs, pose additional opportunities and challenges for sustainable transportation planning and management. With vehicle technological innovation, telematics, and the application of big data, advanced system planning has the potential to achieve sustainable and smarter mobility.

In this Special Issue, we invite any original research and review articles disseminating innovative and sustainable approaches to transportation planning and management. Research areas may include (but are not limited to) the following:

- Sustainable transportation system planning;
- Sustainable transportation mode promoting;
- Sustainable transport policy and environment;
- Smart transportation management;
- Planning and management for autonomous vehicles;
- Planning and management for shared travel modes;
- Travel behavior analysis and modeling;
- Slow traffic improvements;
- Elderly-oriented and barrier-free transportation systems.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
