Message from the Guest Editors

Dear Colleagues,

Sustainability is becoming a pressing current need, as it is necessary to maintain economic prosperity as well as preserve the people and planet. The focal mindset of profit has already increased the CO₂ levels in the environment to severe extent.

In this Special Issue, our aim is to explore the applications of sustainability in supply chain management, operation management, logistics, transportation, vehicle routing models, health care management, and fuzzy sets theory. We invite researchers from various management fields to consider original and high-quality research papers that mainly report on green and sustainability management issues could fulfill the aims of the Special Issue. Manuscripts in Special Issue will focus on both theoretical and empirical studies. Papers may include literature reviews, conceptual theory development, optimization models, and qualitative survey research, such as case studies and quantitative empirical methods. The main topics are green supply chain management, social supply chains, and sustainable supply chain management.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
