Message from the Guest Editors

Sustainable development is a major concern to enable the continuous growth of humanity's well-being. The construction industry is responsible for about 13% of the world's GDP. As such, its sustainability is a major concern for global sustainability.

We are pleased to invite you to contribute to the Special Issue on Sustainable Building Materials, Construction Methods, and Engineering in *Sustainability*, a journal that aims to be a peer-reviewed publication for all issues related to sustainability.

This Special Issue aims to focus on the sustainability of construction materials, methods, and engineering. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- The usage of recycled materials;
- The environmental impact of materials and structure;
- Materials and inputs saving in construction;
- Design methods for improved sustainability;
- LCA comparison of different materials and methods.

We look forward to receiving your contributions. Any questions, please ask Mark Huang <mark.huang@mdpi.com>.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
