Message from the Guest Editor

Dear Colleagues,

Global warming has become a worldwide crisis for which energy consumption is increasingly concerned. In the context of carbon reduction, large-scale renewable energy access to the power grid is a trend, which brings great challenges to the power grid. The power grid faces a series of problems that must be addressed. The aim in this Special Issue is to promote large-scale renewable energy access to the power grid, solve the challenges of renewable energy access to the grid, and promote the development of the power system in a clean and sustainable direction.

Original research articles and reviews are welcome for submission to this Special Issue. Research areas may include (but are not limited to) the following:

- renewable energy forecast and scheduling;
- load off-grid and load carrying capacity and adaptability of power grid;
- power system flexibility and responsiveness;
- power system planning and operation strategy;
- study on the mechanism of electricity market;
- research on energy storage;
- study on stability and security of power system;
- how to balance the issues of reliability, cleanliness and economy scientifically.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
