### Message from the Guest Editors

The goal of this special issue is to showcase theoretical and practical contributions regarding sustainable production and sustainable operations management from a variety of industries, especially in the wake of an accelerating transformation towards a carbon neutral economy and an advanced digital society.

The focus of this anthology is on the manufacturing industry which is undergoing complex transformations and has to answer to difficult challenges related not only to sustainability and digitalization, but also supply chain disruptions, resource depletion and engineering personnel shortages.

The editors encourage the submission of interdisciplinary and multidisciplinary approaches that can bring new insights into the field, stimulating and reinforcing competitiveness in harmony with the natural environment and the social landscape, which are in need of protection and nurturing.
