Message from the Guest Editors

Many innovative solutions involve marinisation for strategic maritime decarbonization. This fact makes the assessment of potential solutions increasingly attractive and meaningful, especially with life cycle analysis techniques providing a comprehensive, informative and systematic approach to assessing and forecasting performances of innovative technologies implemented in marine activities such as maritime transport, platform operations and renewable energy integration.

This Special Issue aims to present and exchange ideas and information on the life cycle analysis of innovative technologies and solutions tackling the current maritime decarbonization issue. This will help the marine sector to identify the excellence of potential innovative solutions in terms of life cycle performance and to advance the application of life cycle analysis technique in maritime research activities.

- life cycle analysis
- life cycle cost analysis
- marine transportation
- innovative power solutions
- green fuels
- marine emissions
- marinisation

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
