Deadline for manuscript
submissions:
closed (30 September 2023)

Message from the Guest Editors

Biotechnology has application in five major industrial areas, medicine, agriculture, aquaculture, biofuel and environment. It is well-known that biotechnology uses organisms or parts of them to benefit of humanity, reducing waste, controlling specific reactions, producing novel compounds for therapeutics, improving waste treatment, producing nutraceuticals, etc. All biotechnological applications consider at least one key point for sustainability.

This Special Issue welcomes high-quality papers in the huge field of industrial biotechnology applications, focused on the resilient value of biotechnology for sustainable development. The Special Issue will publish papers in the areas of biopharmaceutical production, gene therapy, genetic improvement of crops, biochemical food processing, aquaculture biotechnology, biofuel production and improvement, bioremediation, phytoremediation, phycoremediation, molecular toxicology, novel cell culture methodologies, and bioinformatics. We encourage submissions of papers highlighting novel application for sustainability.

We look forward to receiving your contributions.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
