This Special Issue aims to publish original and high-quality research papers with topics including (but not limited to):

- Impact and applicability of tools and (emerging) technologies for improving data collection, validation, centralization, and analysis (e.g., AI/ML, process/workflow, and decision-making (hyper)automation, data analytics, blockchain, etc.);
- Impact and applicability of tools and technologies for holistic (baseline) assessments (e.g., data and digital platforms, incentive schemes, performance management cycle, etc.);
- Tools, technologies, and frameworks with a focus on integrative KPIs and measurement systems (e.g., life cycle analysis, double materiality, system of record);
- Tools, technologies, and frameworks for multi-stakeholder analysis and decision-making across the value chain (i.e., supply chain actors, investors, bankers, insurers, employees);
- Tools, technologies, and frameworks for ESG data (quality) management and auditability (e.g., availability, comparability, validity, reliability, timeliness, etc.);
- Frameworks and roadmaps on evolving ESG maturity (e.g., across data collection and validation, strategic positioning, reporting standards, etc.).
