Message from the Guest Editor

This Special Issue aims to publish original and high-quality research papers with topics including (but not limited to):

- Impact and applicability of tools and (emerging) technologies for improving data collection, validation, centralization, and analysis (e.g., AI/ML, process/workflow, and decision-making (hyper)automation, data analytics, blockchain, etc.);
- Impact and applicability of tools and technologies for holistic (baseline) assessments (e.g., data and digital platforms, incentive schemes, performance management cycle, etc.);
- Tools, technologies, and frameworks with a focus on integrative KPIs and measurement systems (e.g., life cycle analysis, double materiality, system of record);
- Tools, technologies, and frameworks for multi-stakeholder analysis and decision-making across the value chain (i.e., supply chain actors, investors, bankers, insurers, employees);
- Tools, technologies, and frameworks for ESG data (quality) management and auditability (e.g., availability, comparability, validity, reliability, timeliness, etc.);
- Frameworks and roadmaps on evolving ESG maturity (e.g., across data collection and validation, strategic positioning, reporting standards, etc.).

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
