Message from the Guest Editors

The main focus of Industry 4.0 is the optimization of automation and computer adoption from the third industrial revolution. Powerful computers that continually analyze incoming data over the internet communicate with each other, creating cyber-physical systems, the Internet of Things and systems to efficiently and effectively drive the manufacturing sector, equipped with advanced manufacturing technologies.

Growing complications in advanced design and manufacturing requires engineers' profound understanding of innovative concepts from proper training and problem-handling skills. To this end, there is an urgent need for the suitable assessment and evaluation of the current state, followed by the modernization and transformation of courses and delivery methods in engineering programs and other STEM disciplines. In this Special Issue, we solicit manuscripts to share innovative education ideas and give an overview of various hands-on and/or active learning technologies for a strengthened learning environment so that students can be trained to meet the industrial needs of the future workforce.

an Open Access Journal by MDPI

Editor-in-Chief

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
