Message from the Guest Editors

The complex interactions and dynamic feedbacks between socio-economic and environmental systems make it difficult to understand the potential consequences of decisions under ongoing environmental changes.

This Special Issue (SI) is dedicated to “Sustainable Water Resources Management under Environmental Changes: Progresses, Challenges and Opportunities” and seeks to capture cutting-edge research and practices from researchers, practitioners, water managers, and decision-makers. We would like to provide a comprehensive collection of such water-related research contributions with the aim of rapid and wide dissemination and application of research results. In this SI, we would like to call for original papers that address the recent advances, future challenges and potential direction on the subject of sustainable water resources management from technological, economic, managerial and societal perspectives. We are also looking for papers that analyze current and/or future water resources sustainability levels at the global, country, and intra- and inter-country levels.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
