submissions:

**closed (1 May 2024)**

### Message from the Guest Editors

This Special Issue aims to gather different methods of processing, valorization, disposal, and/or use of sewage sludge at the world level, giving an overview of regulatory risks and restrictions. The goal is to encourage the scientific and professional community to adopt widely applicable guidelines in the field of defining optimal methods of sludge treatment and disposal, with a high probability of new scientific discoveries or technologies that will significantly affect the technological, ecological, and economic value of sludge management (discovery of new, more efficient, environmentally friendly, and cost-effective technological processes or improvements to existing technologies).

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
