Message from the Guest Editors

Dear Colleagues, The current energy crisis has dramatically increased pressures to accelerate the transition of energy systems away from fossil fuels towards renewable sources. TGreen energy trade, i.e. the storage, transport, and on-demand release of energy produced from renewable sources, is coming into focus. What are the opportunities and challenges in developing and governing green energy trade? How can emerging technologies and policies address the trilemma of cost-effectiveness, security, and sustainability? This Special Issue aims to develop a better understanding of the societal, economic, and political features of green energy trade and its underlying technologies such as hydrogen or reactive metals. This includes analyses of socio-economic and political conditions linked to innovation, marketization, as well as environmental and social sustainability in green energy trade. In this multidisciplinary, multimethod Special Issue, original research articles and reviews are welcome. We look forward to receiving your contributions. Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
