Message from the Guest Editors

The exploration and sustainable utilization of geoenery (e.g., oil and gas resources) in basins have significant implications for the world. Recently, breakthroughs have been obtained in deep and ultradeep tight reservoirs, shale gas development, and geothermal resource exploration. Tectonic analysis is a basic geological process to determine basin origin and evolution, oil and gas accumulation, and hydrocarbon/geothermal resource exploration and development. This Special Issue aims to present and discuss findings and technologies related to basin tectonic analysis and geoenery exploration.

In this Special Issue, contributions related to, but not limited to, the following topics are welcome:

1. Basin tectonic analysis using kinematics or geodynamics.
2. In situ stress prediction.
3. Structural interpretation and styles.
4. Natural fracture formation mechanisms and predictions.
5. Oil and gas reservoir analysis.
6. Basin–orogen coupling.
7. Numerical modelling for hydrocarbon development.
8. Geothermal resource exploration.
9. Other advanced research on basin tectonics and geoenery exploration.

an Open Access Journal by MDPI

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
