### Message from the Guest Editor

In the age of globalization, organizations, irrespective of their type, size or sector, are facing multiple challenges in their daily activities and processes. Confronted with ever-changing conditions, they have to solve various economic, social and environmental problems. As a result, in recent decades, organizations from both the public and private sectors have increasingly understood the need to behave socially responsibly. Moreover, the social responsibility of organizations is related not only to sustainability but also to their (corporate) governance. Among others, good governance means that an organization is responsive, accountable and follows the rule of law.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Social responsibility of public institutions;
- Corporate social responsibility;
- Environmental sustainability;
- Accountability;
- Corporate governance;
- Good governance;
- Sustainability.
