Message from the Guest Editors

Green Infrastructure has become one of the important elements for sustainable water resources management. It could be an aid to provide sustainable solution of every problem on water resources management – flood control, pollution control, stormwater harvesting and climate change adaptation. To provide environmental, economic, and social benefits, a wide range of green infrastructure related to water resources is available in practice; some of them are – infiltration systems, bio-retentions systems, swales, permeable and porous pavement, rainwater harvesting systems, rain gardens and constructed wetlands. Only the technical performances of these devices may not fulfil the goal of sustainability on water resources and therefore, an integrated approach on technical, economic, political, and social may be required to widespread take up of green infrastructure. The aims of this Special Issue are to publish latest reviews, research articles and technical notes in broader ranges of topics on sustainable water resources management using green infrastructure.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
