Deadline for manuscript submissions:

**30 November 2024**

### Message from the Guest Editors

Dear Colleagues,

We are pleased to introduce this Special Issue on *Renewable and Sustainable Energy for Sustainability Future: Current State, Potential and Perspectives*.

Renewable energy has emerged as a key solution to meet the growing energy needs. A sustainable future for future generations depends on the continued investment in and promotion of renewable energy sources. Therefore, renewable energy sources have emerged as a major policy issue at the national, European, and international level. Integrated spatial and energy planning approaches can support policies of environmental and climate protection. Spatial dimensions of renewable energy systems as well as restrictions, limitations, challenges, and opportunities in different spatial contexts have become even more important.

The focus of this Special Issue is on research and case studies that examine the issue of renewable and sustainable energy addressing technical/engineering and technological aspects as well as sustainability spatial planning issues at different spatial scales, ranging from national and regional planning policies to planning at the town or local level.

We look forward to receiving your contributions.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
