Deadline for manuscript
submissions:

30 November 2024

Message from the Guest Editor

Population growth, especially in urban areas of developing countries, has led to a significant increase in demand for water; this is associated with increased local water scarcity, putting enormous pressure on existing sewerage networks and wastewater treatment plants, and affecting drinking water resources through the infiltration of untreated wastewater.

The purpose of this special issue is to publish high quality research articles and reviews that address recent developments in global sustainable integrated wastewater management approaches for the protection of vulnerable water resources. The scope of this special issue includes, but is not limited to, the following topics

- Examples/concepts of integrated wastewater management systems for the protection of vulnerable water resources. Water-energy-food nexus.
- Innovative decision support tools for integrated wastewater management.
- Groundwater/hydrogeological risk assessment analysis.
- Crop response to treated wastewater reuse.
- Effects of treated wastewater on soil quality.
- Socio-economic impacts of treated wastewater reuse.
- Governance and water policy.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
