Deadline for manuscript
submissions:

30 November 2025

Message from the Guest Editor

This Special Issue aims to foster a deeper understanding of how global and regional climate dynamics, energy transitions, and food systems intersect. The focus is on exploring sustainable development strategies that can address these challenges, identifying solutions that enhance resilience, ensure food security, and support sustainable energy use.

We welcome contributions that address the following:

- The role of climate policies in transforming energy and food systems.
- Innovations in sustainable energy production and their implications for food security.
- The economic, social, and environmental impacts of food and energy insecurities, and how these are exacerbated by climate change.
- Multiscale governance approaches and policies to enhance resilience in the food and energy sectors.

The scope of this Special Issue is broad and incorporates interdisciplinary perspectives including, but not limited to, economics, environmental science, energy policy, agriculture, and global development. We encourage studies that utilize novel theoretical frameworks and quantitative and qualitative methodologies, as well as case studies conducted across diverse geographic regions.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
