Message from the Guest Editor

Dear Colleagues,

Digital transformation and sustainability are two popular topics attracting the investment of enormous amounts of money and time. They are, in some ways, very different topics, yet there is significant overlap. Digital transformation is not merely an opportunity for financial enrichment, it also opens up prospects for building a better and more sustainable world. The aim of this Special Issue is to further explore how the technologies and processes inherent in digital transformation can support sustainability.

While developments in artificial intelligence have come to dominate the attention for many, other specific technologies, such as blockchain, advanced virtual reality, 5G and the Internet of Things, can also support sustainability. In addition to the specific technologies that must be considered, the manner in which whole sectors of the economy are undergoing processes of digital transformation also impacts sustainability.

This Special Issue welcomes papers related to the issues highlighted here, or similar questions pertaining to the role technology plays in sustainability.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
