Deadline for manuscript
submissions:

24 October 2024

Message from the Guest Editors

The development and utilization of underground space resources is an inevitable necessity for human beings to achieve sustainable development, and has become a national strategic demand of many countries. In recent years, the increasing number of studies and practices related to the planning and development of underground space worldwide has provided an opportunity to enhance our understanding of the relationship between underground space utilisation and sustainable development. We propose a wide-ranging topic that can be summarized as “Underground Space Planning and Design for Sustainable Development”. This highly interdisciplinary theme can, therefore, involve a wide scientific audience, from geologists to mining, urban, environmental and management engineers, as well as economists and educators.

This Special Issue invites submissions of articles that contribute to a better understanding of the planning and development of urban underground space for sustainable cities and underground mines.

We look forward to receiving your contributions.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
