Deadline for manuscript
submissions:
27 December 2024

Message from the Guest Editors

This Special Issue aims to explore the intersection of intelligent transportation, cooperative systems, and vehicle automation, with a strong focus on sustainability.

This Special Issue aims to bring together researchers, practitioners, and experts to explore the latest advancements, challenges, and opportunities in sustainable intelligent transportation, with a specific focus on cooperative systems and vehicle automation. We welcome original research articles, reviews, and case studies covering a wide range of topics related to this theme, including but not limited to:

- Cooperative systems for intelligent transportation
- Vehicle automation technologies and their impact on sustainability
- Intelligent transportation infrastructure and communication systems
- Energy-efficient routing and traffic management
- Sustainable mobility solutions and shared transportation services
- Intelligent transportation systems for smart cities
- Environmental impact assessment of intelligent transportation systems
- Policy and regulatory frameworks for sustainable intelligent transportation
- Human factors and user acceptance of cooperative systems and vehicle automation

Special Issue

Editor-in-Chief

Prof. Dr. Marc A. Rosen
Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
