Message from the Guest Editors

The current evidence indicates that, apart from the expected temperature rise and drying in most parts of Africa, climate change will result in increases in both the frequency and severity of extreme weather

Events, such as droughts and floods. This will harm the foundations of Africa's development, from health systems to agriculture, ecosystems, water resources, energy resources and physical infrastructure, with adverse implications for the achievement of the Sustainable Development Goals. Many African countries, which are already facing climate-related stresses, such as droughts, floods, locust infestation and variable rainfall, are highly vulnerable to the impacts of climate change due to low adaptive capacity.

Agriculture will be the hardest hit sector due to its dependence on rainfall. Seven out of ten Africans depend on agriculture for their livelihoods and it accounts for about a quarter of the GDP of African economies, on average, and as much as 50% in some countries.

an Open Access Journal by MDPI

Editor-in-Chief

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
