Deadline for manuscript
submissions:

8 November 2024

Message from the Guest Editors

Sustainable transportation is an aspiration of every company and country. However, in order to ensure the basic principle of logistics "just in time", it is necessary to evaluate many factors related to route planning, customer needs, and other issues related to transportation. In this case, sustainable transportation is inseparable from timely logistical supply chain management, where the most important indicator is the appropriate selection of transport, as well as the entire successful organization and management of the transportation process. This principle of sustainable transportation also includes the concept of green logistics, where sustainable solutions are aimed at saving the environment and available resources. In order to realize the set goals of sustainable transportation, it is necessary to apply innovative managerial and organizational solutions related to the optimization of activities, risk management, and the modelling of certain situations or tasks.

Therefore, this Special Issue will aim to collate the best relevant research on this topic. We invite you to contribute to this issue by providing detailed reviews, case studies, or research articles.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
