submissions:

31 July 2025

Message from the Guest Editor

Dear Colleagues,

Sustainability stands as a paramount objective for humanity, encompassing economic, environmental, and social dimensions within a comprehensive framework. It entails restoring and safeguarding the environment, prioritizing human welfare and societal concerns, and securing the prosperity and longevity of present and future generations. Confronted by pressing global issues like climate change, dwindling natural resources, and escalating social disparities, embracing sustainable practices becomes imperative to safeguard planetary ecosystems, foster inclusive economic progress, and uphold the societal welfare of diverse communities.

The main objective of this Special Issue is to bring together articles that contribute to sustainable development in its most varied aspects, with an emphasis on tools for sustainability, ESG, GRI, and SDGs, ranging from theoretical reflections, through the presentation and analysis of applications, to proposals for various solutions.

In this Special Issue, original research articles and reviews are welcome. I look forward to receiving your contributions.

an Open Access Journal by MDPI
