Deadline for manuscript submissions:

**closed (31 October 2023)**

### Message from the Guest Editors

Dear Colleagues,

Air pollution has played a negative role in human health, ecological environment, and climate change over the past 100 years, which has significantly worsened in recent decades and is likely to be persistent in the future. Such “sustainable” threats, without doubt, require sustainable assessment and management. However, huge gaps remain due to not only vast puzzles in air pollution mechanisms but also insufficient techniques for sustainable assessment and management. A catastrophic consequence of this is that there is still a large amount of air pollution worldwide that is not being monitored or controlled.

The objective of this Special Issue is to provide broad scientific advances in the sustainable assessment and management of air pollution, with special technical focuses on breakthroughs in fundamental theories, real-world measurements, retrospective simulations, trend forecasts, source apportionments, end-of-pipe treatment, and policymaking.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
